

North Pointe Property Owners' Association

Optional Goose Fencing

Individual property owners with lakefront property may, if they choose, install approved goose fencing to deter geese from entering their property.

Approved goose fencing shall conform with those already in use, comprised of plastic chain and metal stakes, black in color. They are to be installed at the water's edge, so as to not interfere with contractual lawn care services. Purchase and installation of these chains are at the property owner's expense.

The NPPOA Board reserves the right to modify, or rescind this action as it deems appropriate.

Further information on the approved goose fencing specifications, and how to obtain or install them may be found on the NPPOA website.

Date Approved: May 1, 2017
