

## **NPPOA Goose Fence - Further Guidance For Lake Front Property Owners**

### **Posts**

The tent stakes with an eye through which the chain can be threaded is optimal. We found some available at [www.canopiesandtarps.com](http://www.canopiesandtarps.com). Go to accessories tab and hit tent stakes. 31-inch stakes will work best and sets of 10 are \$35.99. Shipping not included.

### **Black Plastic Chain**

The chain can be found online or in local stores. Please use the black #8 size. Prices are \$.58 - \$.68 per foot.

### **Black Zip or Cable Ties**

Make sure they are for outdoor application and will withstand extreme cold. 8-inch ties work well and may be cut down.

Stakes should be driven so that 12 -15" remain above ground and placed 8-10 feet apart.
